## RESEARCH INTEREST

---

My research interest lies in computer architecture and security, with a particular focus on mitigating microarchitectural side-channel attacks. I am especially interested in applying formal methods and programming language principles to advance security analysis and design comprehensive defense mechanisms against microarchitectural vulnerabilities.

## EDUCATION

---

<b>Massachusetts Institute of Technology</b> <i>Ph.D. Student in Computer Science</i> • <b>Advisor: Prof. Mengjia Yan</b>	2022 - Present Cambridge, MA, USA
<b>University of Michigan</b> <i>B.S.E. in Computer Science</i>	2020 - 2022 Ann Arbor, MI, USA
<b>Shanghai Jiao Tong University</b> <i>B.E. in Electrical and Computer Engineering</i>	2018 - 2022 Shanghai, China

## RESEARCH EXPERIENCE

---

<b>Securing Cryptographic Software via Typed Assembly Language</b> <i>Proposed a static program analysis technique that helps transform cryptographic assembly programs so that they split their public and secret data across coarse memory regions</i> <i>Enabled the Spectre mitigation that tracks secret data flow in the processor and delays insecure speculative operations that leak the secret data</i> <i>Paper accepted at CCS'25</i>	2023 - 2025
<b>Protecting ASLR Against Microarchitectural Attacks</b> <i>Systematically analyzed existing microarchitectural attacks that leak the ASLR secret</i> <i>Presented a software-hardware co-designed mitigation that strengthens ASLR against these attacks and introduces negligible overhead</i> <i>Paper accepted at NDSS'25</i>	2022 - 2024
<b>Redesigning the Branch Target Buffer for Data Center Applications</b> <i>Presented a novel BTB replacement policy that achieves near-ideal front-end processor performance for data center applications</i> <i>Paper accepted at ISCA'22</i> <i>Won the first place award at MICRO'21 ACM Student Research Competition</i>	2021
<b>Enabling Early Hardware Development for Futuristic Data Center Applications</b> <i>Characterized widely-used data center applications (e.g. MySQL, MongoDB, FFmpeg, Nginx) and predicted how these applications might evolve in the future to enable suitable hardware development early on</i>	2021

## PEER-REVIEWED CONFERENCE PUBLICATION

---

<b>Securing Cryptographic Software via Typed Assembly Language</b> <i>The ACM Conference on Computer and Communications Security (CCS) 2025</i> <b>Shixin Song*</b> , Tingzhen Dong*, Kosi Nwabueze, Julian Zanders, Andres Erbsen, Adam Chlipala, Mengjia Yan	2025
<b>Oreo: Protecting ASLR Against Microarchitectural Attacks</b> <i>The Network and Distributed System Security (NDSS) Symposium 2025</i> <b>Shixin Song</b> , Joseph Zhang, Mengjia Yan	2025
<b>Thermometer: Profile-Guided BTB Replacement for Data Center Applications</b> <i>International Symposium on Computer Architecture (ISCA) 2022</i> <b>Shixin Song</b> , Tanvir Ahmed Khan, Sara Mahdizadeh Shahri, Akshitha Sriraman, Niranjana K Soundararajan, Sreenivas Subramoney, Daniel A. Jiménez, Heiner Litz, Baris Kasikci	2022

## AWARDS AND HONORS

---

<b>EECS MathWorks Fellowship</b> <i>Massachusetts Institute of Technology</i>	2025
<b>Ho-Ching and Han-Ching Fund Award</b> <i>Massachusetts Institute of Technology</i>	2025
<b>Presidential Graduate Fellowship Award</b> <i>Massachusetts Institute of Technology</i>	2022
<b>CRA Outstanding Undergraduate Researcher Award Honorable Mention</b> <i>Computing Research Association</i>	2022
<b>ACM Student Research Competition First Place Winner</b> <i>MICRO'21</i>	2021
<b>Roger King Scholarship</b> <i>University of Michigan</i>	2021 <i>Ann Arbor, MI, USA</i>
<b>Dean's List</b> <i>University of Michigan</i>	2020, 2021, 2022 <i>Ann Arbor, MI, USA</i>
<b>SJTU Undergraduate Excellence Scholarship</b> <i>Shanghai Jiao Tong University</i>	2019, 2020 <i>Shanghai, China</i>
<b>Fuda Scholarship</b> <i>Shanghai Jiao Tong University</i>	2019 <i>Shanghai, China</i>

## EXPERIENCE

---

<b>Teaching Assistant</b> <i>Massachusetts Institute of Technology</i> <ul style="list-style-type: none"><li>Secure Hardware Design (6.5950)</li></ul>	2025 <i>Cambridge, MA, USA</i>
<b>Undergraduate Research Assistant</b> <i>University of Michigan</i> <ul style="list-style-type: none"><li><b>Advisor:</b> Prof. Baris Kasikci</li></ul>	2021 <i>Ann Arbor, MI, USA</i>
<b>Grader</b> <i>University of Michigan</i> <ul style="list-style-type: none"><li>Introduction to Cryptography (EECS 475)</li><li>Introduction to Computer Organization (EECS 370)</li></ul>	2021 - 2022 <i>Ann Arbor, MI, USA</i>
<b>Teaching Assistant</b> <i>Shanghai Jiao Tong University</i> <ul style="list-style-type: none"><li>Introduction to Computers and Programming (VG 101)</li><li>Introduction to Engineering (VG 100)</li><li>Honors Mathematics II (VV 186)</li></ul>	2019 - 2021 <i>Shanghai, China</i>
<b>Student Advisor</b> <i>Shanghai Jiao Tong University</i>	2019 <i>Shanghai, China</i>
<b>Volunteer Teaching</b> <i>Sanhe Junior School</i> <ul style="list-style-type: none"><li>Math classes for grade 7 students</li></ul>	2018 - 2019 <i>Yunnan, China</i>

## TECHNICAL SKILLS

---

**Languages:** C/C++, Python, OCaml, Coq, SystemVerilog  
**Software Tools:** gem5, Linux Perf, Intel VTune, ChampSim, Docker

## COURSE WORK

---

### **Massachusetts Institute of Technology**

- \* 6.5900: Computer System Architecture, 6.5120: Formal Reasoning about Program, 6.5620: Cryptography & Cryptanalysis, 6.8300: Advances in Computer Vision

### **University of Michigan**

- \* EECS 470: Computer Architecture, EECS 482: Introduction to Operating System, EECS 475: Introduction to Cryptography

### **Shanghai Jiao Tong University**

- \* VE 280: Programming and Elementary Data Structures
